Éric,

It's been now almost 2 years now since we have implemented VIVA!Freight and VIVA!Sales at Axxess International Inc. I would like to thank you personally for the help that you and your team provided us since the beginning.

As a start up company, Axxess International needed to get in partnership with a solid software provider that was flexible enough to help us to differentiate ourselves on the market. We feel that with PC Plus, we've been supported by a team of professionals that were ready to go beyond the existing limits of its software solution. We truly appreciated all the help and customization that you have provided to make Axxess International Inc. a leader in the Freight Forwarding industry in its market.

The implementation of solutions such as eCargo really helped us to provide our valuable clients an efficient tracking tool for their Freight movements. This is a tool act as a wild card when we solicit new business.

We are looking forward for many other years of profitable partnership.

Kind Regards,

J.F. Brunet
Axxess International Inc.
